

Find New and Enhanced Tools at the Lexile® & Quantile® Hub

[HUB.LEXILE.COM](https://hub.lexile.com)

Platform Offers Reading and Math Tools

The Lexile and Quantile Hub is a convenient online platform that provides educators, parents and students with easy access to more than a dozen reading and math tools.

THE HUB PROVIDES:

- ✓ **Everything in one place.** Discover new and enhanced tools that support student learning and growth in reading and math.
- ✓ **Better support.** Enjoy quick start guides and video tutorials.
- ✓ **Flexibility.** Navigate to tools without signing in or unlock additional feature sets by registering.

Metrics Connect to Useful Tools for Classroom and Home

Many states offer Lexile® and Quantile® measures for students from their state's assessment. Lexile and Quantile measures describe a student's reading and math abilities and can be used to:

- Match students with reading materials or math resources at their level.
- Monitor progress over time.

If you don't have your student's measures handy, you can use grade level estimates built into many of these tools.

GET STARTED AT [HUB.LEXILE.COM](https://hub.lexile.com).

Discover Words Students Need To Know

Create custom lists of key vocabulary by grade level and subject with the **Lexile® WordLists** tool. Unlike other academic word lists, ours is based on the words that students encounter in their studies.

“ I spend a lot of time as a teacher helping students with vocabulary. WordLists helps.”

— high school social studies teacher

Find Just Right Books

Use **Lexile® Find a Book** to find books at a student’s reading level and interests. And now you can:

- Access key vocabulary in a book with definitions, parts of speech and example sentences.
- Identify the reading level by chapter for over 1,200 popular chapter books.

“ Find a Book is a great way to identify books for students. For me to be able to click on an interest topic to find something someone who is several grades behind can access is huge.”

— middle school teacher

Share and Save Math Resources

With the **Quantile® Resource Center**, create and share lists of favorite resources on websites and on social media. Resources are aligned to state standards for all 50 states and calibrated to the **Quantile® Framework for Mathematics**, which means they can be matched to the student’s ability.

“ The Resource Center is a great place to list things students could work on at home. Some parents want math resources to extend their child’s learning. Some parents come in for a conference because their child is struggling.”

— elementary school teacher

The Hub has something for everyone. Access is easy!

The Lexile and Quantile Hub’s tools are available at three levels of access:

PREMIUM

FOR EDUCATORS

All-access to tools and features that assist and guide you in improving your classroom instruction.

Use school- or state- issued email address when registering to see if you are eligible for free access.*

BASIC+

FOR PARENTS & EDUCATORS

Essential tools and features that equip you to further your student’s learning and plan for college and careers.

BASIC

FOR STUDENTS

Introductory tools and features that help you find the perfect books and grow as a student.

* We partner with state departments of education to make Hub premium access free for educators. To learn if your state is a partner, view our registration page at hub.lexile.com/registration.
